When purchasing, storing and using jetton, you expressly acknowledge and understand the following risks:

1. RISK OF LOSS

The risk of losing access to the jetton, due to the loss of a private key, a storage error, or an error in purchasing a private key or combination of private keys that are necessary to control and dispose of the jetton stored in your virtual wallet or storage. Accordingly, loss of the required private key(s) associated with your virtual wallet or token storage will result in the loss of such tokens.

Moreover, any third party with access to these keys, including access to the virtual wallet or storage credentials that you use, may misappropriate your jettons.

Any errors or failures associated with the virtual wallet or storage facility that you have chosen to accept and store jettons, including your own failure to properly maintain or use such virtual wallet or storage facility, may also result in the loss of your jettons.

In addition, failure to accurately follow the procedures for purchasing and receiving Jettons, including incorrectly providing the email address you provide to receive Jettons, may result in the loss of your Jettons.

2. RISK ASSOCIATED WITH THE BLOCKCHAIN PROTOCOL

Because jetton and cryptocurrencies are based on a blockchain protocol, any malfunction, breakdown or failure of the blockchain protocol could have a material adverse effect on the Platform or jetton. Moreover, advances in cryptography or technological advances, such as the development of quantum computing, may pose risks to Jetton and the Platform, including the benefit of Jetton to obtain related services, by exposing ineffective encryption mechanisms that underlie the blockchain protocol.

3. RISKS OF MINING ATTACKS

Like other decentralized encryptions based on the blockchain protocol, Jetton is susceptible to mining attacks during the process of adding Jetton transactions to the blockchain, including doubling attacks, majority mining attacks, and proprietary mining attacks. Any successful attack poses a risk to the Platform and Jetton, including, but not limited to, complete destruction and recording of Jetton transactions.

4. RISK OF HACKING AND SECURITY SYSTEM DISADVANTAGES

Hackers or other malicious groups or organizations are capable of attempting to interfere with the Platform or jetton in a variety of ways, including malware attacks, service disruption attacks, basic attacks, Sybil attacks, smurfing and spoofing. In addition, because the Platform uses open source software internally, there is a risk that a third party or member of the Company team could intentionally or unintentionally introduce weaknesses into the underlying infrastructure of the Platform, which could negatively impact the Platform and Jetton, including the benefit of using Jetton on the platform.

5. RISKS ASSOCIATED WITH THE JETTON MARKET

Jettons are intended for use solely on the platform, and the Company does not assist in the subsequent sale or determination of the value of Jettons. This limits the intended ability to use Jettons to access or use the Platform and therefore may

create a risk of illiquidity with respect to Jettons you hold. Even if secondary jetton trading is provided by third-party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to market risks.

6. RISK OF UNINSURED LOSSES

Unlike bank accounts or accounts at some other financial institutions, jettons are not insured unless you specifically obtain private insurance to cover them. Therefore, in the event of loss or depreciation of jetton, we do not have a government insurer or private insurance to suggest you turn to.

7. RISKS ASSOCIATED WITH UNCERTAIN PROVISIONS, ENFORCEMENT MEASURES AND EXISTING LEGISLATIVE RISKS.

The jetton regulatory regime and common metering technology are unclear and unstable in many jurisdictions. It is difficult to predict how regulators may apply existing regulations regarding such technology and its applications. Likewise, it is difficult to predict how legislators and regulators may implement legislative and legal changes affecting distributed ledger technology and its applications, including the platform and jetton. Regulatory actions can negatively impact the platform and jetton in a variety of ways. The Company may cease to operate in a jurisdiction if regulations or changes in law and regulation make it unlawful to operate in such jurisdiction or commercially undesirable to obtain the necessary regulatory approvals to operate in such jurisdiction.

In addition, the Company is not responsible for any losses incurred by the Client, and the Client will indemnify and hold the Company harmless from any such losses caused by restrictions and legal barriers, and other legal circumstances, in any jurisdiction, including, but not limited to, the USA, China, Singapore, South Korea.

8. RISKS RELATED TO TAXATION.

Taxation of jettons is unclear. You should seek your own tax advice associated with the purchase of a jetton, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

9. RISK OF ALTERNATIVE PLATFORMS

It is possible to create alternative platforms that use similar functionality to the Platform. The Platform may compete with these alternative platforms, which may adversely affect the operation of the Platform and Jetton, including Jetton's utility in obtaining services.

10. RISKS OF WEAKNESS OR INTERRUPTION IN CRYPTOGRAPHY (ENCRYPTION).

Advances in encryption or technical advances, such as the development of quantum computers, may pose a risk to the cryptocurrency, platform and jetton, which could result in the theft or loss of the jetton.

11. RISK OF LACK OF INTEREST IN THE PLATFORM OR

COMMON APPLICATIONS.

It is possible that the Platform will not be used by a large number of individuals, companies or other organizations, or that there will be insufficient social interest generally to create and operate the Platform. Such lack of interest may negatively impact the development of the Platform or the potential usefulness of Jetton.

12. RISK ASSOCIATED WITH DEVELOPMENT, DEVELOPMENT AND MAINTENANCE PLATFORMS.

The platform is still under development and may undergo significant changes over time. While we intend to monitor the progress of the jetton and Platform specifications in the White Paper and take commercially reasonable steps in that direction, we may have to make changes to the jetton or Platform specifications for a number of legitimate reasons. This may create a risk that Jettons or the Platform as developed and maintained may not meet your expectations at the time you purchased Jetton. In addition, despite our good faith efforts to develop and maintain the Platform, it is still possible that the Platform will experience crashes or other defects and may not be properly developed and maintained, which could adversely affect the Platform and the potential usefulness of Jetton.

14. UNEXPECTED RISKS

Cryptographic jettons are a new and untested technology. In addition to the risks included in Appendix 1, there are other risks associated with the purchase, storage and use of jetton, including risks that the Company is unable to predict. Further risks may arise in unforeseen variations and combinations discussed in this Appendix 1.

PRIVACY STATEMENT OF PERSONAL DATA INTERNET SERVICE TonMiner GLOBAL

GENERAL PROVISIONS

This Statement on the confidentiality of personal data is the official provision of the Internet service 1RUS.COM (hereinafter referred to as the Service). To be able to use the services of the Service, the user must go through the registration procedure by providing the Service Administration with personal data that the Service Administration may

need to provide services. By providing his data to the Service Administration, the User agrees to the transfer of such data to third parties in order to organize the provision of services.

The collection, processing, storage and transfer of personal data of Users that were provided voluntarily by such users is carried out under the following conditions:

The Service Administration respects the privacy of users and has developed this privacy policy to demonstrate its commitment to protecting the privacy of Users. This personal data privacy statement describes the information that the Service Administration collects, how this information can be used, to whom it can be transferred, and in what cases it is disclosed. The Service Administration recommends that Users carefully read this Statement on the confidentiality of personal data when using the Service or conducting business with the Service Administration. By using the Service, the User accepts the rules described in this Statement on the confidentiality of personal data.

The Regulations were developed in strict accordance with the Federal Law "On Personal Data", international regulations in the field of collection, processing, protection and use of personal data, as well as generally accepted rules for the processing, storage and transmission of personal data on the Internet, as well as other regulations -legal documents that regulate the processing, storage and transmission of personal data on the Internet.

In its appearance, this document is an offer, namely a unilateral proposal to an unlimited number of persons to enter into an agreement on the conditions specified in this document. Any active actions of the User within the Service are recognized by the Service Administration as acceptance (acceptance) of this offer and indicate that the User has read the terms of this Statement on the confidentiality of personal data, accepts such conditions, consents to the processing of his personal and other personal data, and also confirms that, in accordance with the jurisdiction of his state, he has the right to enter into such contractual relations (has a sufficient level of legal capacity).

If one or more of the terms of this Privacy Statement becomes invalid, invalid or unenforceable, this does not affect the validity or enforceability of the remaining provisions of this Privacy Statement.

The User is personally responsible for checking this Personal Data Privacy Statement for changes. The Administration of the Service reserves the right, at its sole discretion, to change or supplement this Statement on the confidentiality of personal data at any time without prior or subsequent notice. The Administration of the Service will publish such changes and/or additions at 1RUS.COM. Continued use of the Service and its services, after any such changes, means full acceptance of such changes and additions. The moment of changes to these Regulations is the date of publication of the new version of the Regulations on the pages of the Service at the specified address.

1. **INFORMATION AND DATA COLLECTED IN THE PROCESS OF USING THE SERVICE**
- 2.
3. **1. The Service Administration may collect information that can identify the User. The Service Administration may collect this information through the Service. By using the Service, the User authorizes the collection, analysis and storage of data related to the provision of services and cooperation within the Service.**
4. **2. In the process of using the Service, the User provides the Service Administration with personal and other information that is necessary for the Service Administration to provide services through the Service, including information that can be transferred by the Service Administration to third parties to organize the provision of services.**
5. **3. The Administration of the Service reserves the right to transfer the received information to counterparties in order to fulfill their obligations to such persons.**
6. **4. The Administration of the Service reserves the right to transfer the received information to government agencies and departments upon their request, in accordance with the law and other regulations of the current legislation, as well as international law.**
7. **5. Any personal data is processed in accordance with the Federal Law "On Personal Data", Regulation of the European Parliament and Council (EU) 2016/679. The Administration of the Service uses the provided data only for the purposes listed in this Regulation, as well as to improve the quality of the Service and its services.**
8. **6. The Administration of the Service does not verify the accuracy of the personal data provided by the User, but reserves the right to monitor the accuracy of such personal data. The Service Administration is not**

responsible for negative consequences and conflict situations that occurred as a result of the User providing erroneous personal data.

9.

10.

11.

12. INFORMATION AND DATA YOU MUST PROVIDE TO USE THE SERVICE

13.

14. In order to register as a user and start using the Service, the User will be asked to provide certain data. The Service Administration may collect and store any personal (commercial) information that the User provides when using the Service or in any other way. Any data received is collected, processed, stored and used by the Service Administration in strict accordance with these Regulations, as well as regulations that govern the use of Users' personal data.

15.

1. USING TECHNOLOGY TO COLLECT INFORMATION

2.

3. The Service Administration uses various technologies to collect information from the User's device and about the User's actions within the Service.

4. The Administration of the Service reserves the right to use automated scripts, plug-ins and other software products to collect, process, store and transmit personal and other data of the User that was previously downloaded or transmitted by such User in the process of using the Service.

5. The Administration of the Service reserves the right to make changes to the procedure for collecting, processing, storing and transferring personal and other data received from the User in the process of using the Service. Any changes to the conditions for the collection, processing, storage and transfer of personal and other data are carried out publicly, with mandatory notification to the User through the Service or other communication channels that were formed as a result of the User providing personal contact information. After changes are made to these conditions, a new version of this document will be published and brought to the attention of all Users of the Service.

8. INFORMATION COLLECTED AUTOMATICALLY

9.

10. The Service Administration automatically collects information from the User's browser or device when visiting the Service. This information may include IP address, device ID and type, browser type and language, operating

system (mobile system) used on the device, access time, geographic location of the access device.

11. The Service Administration may collect other information and data that the Service may need to provide services. In such cases, the User will receive a corresponding request for permission to collect additional information and data.

12.

COOKIES AND USE OF COOKIES DATA

“Cookies” are small pieces of information that a website stores on the User’s computer or mobile device while visiting the Service. This allows the server to aggregate information from the browser so that the User does not have to re-enter data when returning to the Service or viewing different pages. The User can learn more about how cookies work at www.cookiecentral.com.

When the User visits the Service, the Service Administration (Software) may install one or more cookies on the User’s device to facilitate future access to the Service and to personalize the User’s experience when using the Service and its services. Using cookies, the Service Administration can automatically collect information about the User’s actions within the Service, the pages that the User visits, the time and date of visits, etc.

Each User can change their browser settings to stop storing cookies. You can accept or reject the use of cookies through your browser’s built-in functionality. Some cookies may be placed by a third party service provider that performs certain functions for the Service Administration.

These cookies are used exclusively for high-quality and complete provision of access to the Service and the provision of information and other services through the Service, including for:

- recognition of new or previous users;
 - remembering the User’s settings preferences;
 - remembering whether the User has already answered the pop-up question;
 - remembering whether the User has given consent (or not) to the use of cookies within the Service;
 - carrying out anonymous collection of general statistics on the use of the Service;
 - sending advertising messages to Users that correspond to the interests of the User.
- Cookies are also used to limit the number of times the User views advertising messages;
- collecting reliable information about the use of the Service, which will allow us to assess how well the Service meets the needs of users and make any necessary improvements;

OTHER TECHNOLOGIES USED IN THE SERVICE

The Service Administration may use standard Internet technologies, such as web beacons and other similar technologies, to track the use of the Service. The Service Administration may include web beacons in advertisements or email messages to determine whether these messages have been opened. The information that the Service Administration receives in this way allows you to customize the services that are offered to users, to deliver targeted advertising and to evaluate the overall effectiveness of online advertising, content or other activities.

Any use of technology during the operation of the Service is carried out exclusively within the framework of current legislation and generally accepted norms of the Internet community.

INFORMATION COLLECTED BY THIRD PARTIES FOR ADVERTISING PURPOSES

The Administration of the Service may allow service providers, advertising companies and advertising networks, as well as other third parties to display advertising on the pages of the Service. These companies may use tracking technologies such as cookies and web beacons to collect information about users who view and interact with their advertisements.

The Service does not provide any anonymous personal information to third parties, except as expressly provided in these Regulations or applicable law.

PROCESSING OF INFORMATION AND DATA RECEIVED

1. The Service Administration may use the information to:
 - 1.1. provision and improvement of services provided within the Service;
 - 1.2. managing the User account and providing customer support;
 - 1.3. conducting research and analysis on the use of the Service;
 - 1.4. communicating with Users via email;
 - 1.5. developing, displaying and tracking content and advertising;
 - 1.6. Service analysts;
 - 1.7. application of any rights specified in documents posted on the pages of the Service.

TRANSMISSION OF RECEIVED INFORMATION AND DATA

1. Personal information. The Service Administration does not transfer personal information to third parties, except for the cases specified in this Statement on the confidentiality of personal data.

2. The Service Administration may exchange personal information with service providers. The Service Administration may exchange information, including personal information, with third parties who perform certain services on behalf of the Service Administration. These service providers may have access to personal information necessary to perform their functions, but may not distribute or use such information for any other purpose.

3. The Service Administration may disclose information, including personal information:

- In response to a subpoena, court order, or request for cooperation with law enforcement and other government agencies; to establish or exercise legal rights, to defend against legal claims.

- When the Service Administration is confident that disclosure is appropriate in connection with efforts to investigate, prevent, or take other measures regarding illegal activities, fraud, and other offenses; to protect the rights, property or safety of users; to comply with applicable laws or cooperate with law enforcement authorities; or to enforce compliance with the terms of use of the Service or other agreements.

SCOPE OF INFORMATION AND DATA PROVIDED

1. The User may not provide certain information, but this may result in the inability to use certain functions of the Service.

PROTECTION OF PERSONAL INFORMATION

The Service Administration takes security measures to protect Users' personal information from unauthorized access and disclosure. However, no system can be completely secure. Therefore, the Service Administration does not guarantee that personal information will always remain secure. Users should also take care in how they handle and disclose personal information and should avoid sending personal information through unsecured channels.

The Administration of the Service protects and protects received personal data in accordance with generally accepted data protection practices in the Internet

community, as well as in strict accordance with international standards in the field of collection, processing, storage and transmission of personal data of Internet users.
