(Extract of interests and costs of community members, created by a community member from the angle of observing the interests of the community and each individual community member)

ToneMiner DAO

1. Terms

1.1 DAO (community, organization) is a decentralized public organization. Communities of people striving for maximum beneficial community within the known universe, through safe, ecological, voluntary, consensual interaction;

1.2 Friend (member, participant, employee, partner) is a full member of the community. A person with equal voices from other human rights advocates is essential to the decisions of the DAO. An active element of the system that creates unconditional originality for DAO

1.3. Candidate (applicant) - potential Friend. A person who wants to join the DAO (invited or self-initiated). The candidate does not have the right to vote on decisions important to the DAO. A candidate that is significant for DAOs in the fundamental first implementation of DAO friends implementation. To turn a Candidate into a Friend, you must pass additional community checks (described below).

2. Goals

2.1 Creation of a fair collective farming system;

2.2. Formation of a DAO governance system where all Friends have visible advocacy voices;

2.3. Ensuring a fair distribution of the benefits obtained as a result of the joint activities of the Druze (fair considerations approving the general vote using the 2.5. system);

2.4. Cooperation to achieve common goals;

2.5. Creation of a controlled (semi-automated) distributed decentralized decision-making system.

2.5.1. Decentralized system of wealth distribution, according to the work contribution of each Friend (determined by the formulas included in the Voice of Friends, in accordance with the definition of work contribution and skill level, this formula can be changed for the next reporting period, by voting of Friends).

2.5.2. A decentralized system for recording labor contributions and providing progressive digital information on such contributions by DAO Friends (formula (logic) determined by the voice of Friends).

2.5.3. Feedback systems for adjusting indicators/algorithms of systems operation (warning system)

3. Rights and obligations of Friends:

3.1. Rights:

3.1.1. Invite new Friends. Each DAO Friend has the right to invite new candidates to the community. The candidate undergoes community verification (defined in Section 4). Before joining, the candidate must be informed of the purposes of the DAO and agree to the bylaws of the DAO.

3.1.2. Arbitrary contribution to the DAO Each Friend has the right to make any valuable contribution to the DAO (whether it be labor, information support, one-time financial assistance or assistance with subscription rights, provision of services, any other material or intangible assistance, support);

3.1.3. Obtaining privileges (compared to neutral people and candidates) after the formation of tools and a distributed mechanism that makes decisions within the framework of the created principles;

3.1.4. The right to receive all development-related information.

3.1.5. Receiving informational, psychological or any other support from the community (approved by the personal consent of a Friend, or by voting of Friends in compliance with the principles of DAO management)

3.1.6. I propose for collective discussion to consider and discuss important issues related to other issues and problems.

3.2. Responsibilities:

3.2.1. Follow the DAO charter

3.2.2. Maintain the confidentiality of data (available only to Friends);

3.2.3. Take part in voting on socially necessary issues of the DAO;

3.2.4. Invite new candidates to the DAO;

3.2.5. Make socially beneficial contributions to the DAO;

3.2.6. Provide informational and psychological support to Druze and candidates;

3.2.7. Additional responsibilities for each of the Friends may be limited by passage and general vote, provided that the Friend fully agrees with the topic to assume the specified responsibilities, the community agrees that the Friend's competence is sufficient to fulfill these obligations

4. Procedure for accepting new Friends:

4.1. To become a candidate you must:

4.1.1. or express a desire to join the DAO (orally or in writing);

4.1.2. or have a recommendation from a Friend;

- 4.2. The candidate must be aligned with the organizations values and values;
- 4.3. The candidate, after all, the trusted party (council) of the participants or the head of the organization, adheres to the principles of transition to structural, quality and social formations;
- 4.4. A candidate after all, a trusted party (council) of participants or an invited organization on the management theory necessary to change the structure and quality of the social order;
- 4.5. The candidate after all, the trusted party (council) of the participants or the head of the organization on the availability of technical capabilities to ensure productive work in the organization;
- 4.6. Once all checks have been completed, the candidate becomes a Friend;

5. The procedure and consequences of a participant leaving the community:

- 5.1. A Community Friend may voluntarily resign from the DAO by giving written notice to other DAO Friends 2 weeks in advance, forfeiting all privileges accrued during his employment with the DAO, or retaining Candidate status with the subsequent option to return to Friend status at will and after completing the appropriate procedure:
 - 5.1.1. Before leaving, a community member is obliged to close all his obligations and/or transfer them to another community member;
- 5.2. A friend may be expelled from the organization through an open public vote for repeated failure to comply with DAO obligations or for repeated or materially negative violations of the DAO charter.
 - 5.2.1. In the event that a Friend is expelled from the DAO for repeated failure to fulfill his obligations, he retains the privileges of a DAO candidate, as well as the privileges received during his employment within the automated DAO system. He becomes a candidate;
 - 5.2.2. In the event that a person is expelled from the DAO for repeated violations of the DAO charter, or for violations that lead to significant negative consequences for the DAO, he may be partially or completely deprived of the privileges received during his employment within the DAO. The decision to revoke privileges is made by voting and cannot be executed immediately. For some time (agreed with Friends), the excluded enemy may have partial (limited) access to privileges specifically defined for this case (in order to exclude impulsive decisions). Ultimately, such a person receives the status of “enemy” and loses all DAO privileges;

6. Procedure for providing information:

- 6.1. Every Friend has access to information about the development of DAO;
- 6.2. For disclosure of information by a community member, sanctions are imposed on the violator in agreement with the community council. The maximum possible sanction is exclusion from the community;

7. The procedure for interaction with organizations with similar charters:

- 7.1. An organization with the same or similar charter may become a candidate organization through a vote of Friends;
- 7.2. Members of candidate organizations are subject to the same privileges as candidates;
- 7.3. A candidate organization may receive friendly “fraternal” status through a vote of Friends;
- 7.4. Each fraternal organization independently determines the classes of information that it is able to share and/or exchange with any other fraternal organization, based on the principles of maximizing mutual benefits and reducing the risks of both organizations;
- 7.5. Fraternal organizations may merge into one organization or split into several independent fraternal organizations.

7.6. If one fraternal organization, in the process of competition, completely makes sense of the second organization (wins the competition), then the responsibility of the first is to take care of the Friends from the senseless organization;

8. Procedure for changing the DAO charter

8.1 The Charter may be amended or supplemented;

8.2. Such changes/additions are agreed with Friends and can be adopted by voting;

8.3. After the adoption of the changes to the charter, Friends who voted "against" the changes must determine their status in the organization by adopting a new charter or by starting the procedure for voluntary withdrawal from the organization (to candidate status). [This point needs additional regulations and definitions];

8.4. Changes to the charter come into force immediately after adoption;

8.5. By agreement with the Friends by voting, changes to the charter may or may not have retroactive effect (affect previously made decisions);

9. Decision making:

9.1. A socially important decision is considered "adopted" if the number of those voting for this decision is 66% or more in relative units (as determined by the Friends according to the formulas adopted at the vote);

9.2. Abstentions are not counted in the vote count. Absentees are counted as gray votes. If gray votes can influence decision making (change the overall percentage of votes so that the decision changes its status), then it is NECESSARY to wait for the absent ones;

9.3. If more than 25% of Friends voted for a socially important decision, then consideration of this issue can be reconsidered after an agreed period of time (a month);

9.4. Decisions with less than 25% of the votes cannot be considered again;

9.5. Intermediate (labor) decisions are made by competent people. If there is disagreement on such decisions, they are made through a vote of competent and interested people. It is enough to get 50% of the votes + 1 vote (ONLY the votes of Friends who took part in the voting are taken into account).

DAO TonMiner has released a token for community voting on the platform [TON VOTE - Ton Miner](#) for the development and promotion of the project. 1RUS DAO In the amount of 8000000000 contract EQBT2Ee4Lx5w9ul7oMly5upXNs3ABWL_Fwk1uiM74gZCGaYt
